**Trimble Construction Supply
to Co-sponsor RM Visions 2010
Industry Technology Forum**

For Immediate Release
John Rabchuk, Systech
630-515-0200

Woodridge, Illinois - Systech Inc., an innovative technology leader in automation technology solutions for the construction materials industry, is pleased to announce that Trimble Construction Supply has joined Systech as a co-sponsor of the RM Visions 2010 industry technology forum being held in Chicago on May 20-21, 2010, at the Westin Hotel – River North.

“Despite the economic climate that the construction materials industry has endured for the past couple of years, the unique format and content of RM Visions 2010 has certainly caught the attention of dynamic industry executives that are looking for ways to improve the long-term productivity and efficiency of their operations,” says John Rabchuk, President of Systech. “Trimble Construction Supply is an ideal co-sponsor for RM Visions 2010, as they have provided outstanding technology leadership to our industry since they introduced the first fully integrated, intelligent GPS-based systems. As Trimble Construction Supply has announced its’ next generation products providing enhanced productivity, data collection and transportation efficiency; the RM Visions 2010 forum is ideally suited to discuss future technology requirements with the leading executives from our industry.”

“In particular, the inclusion of Chris Steiner, author of the New York Times best seller \$20 per Gallon: How the Inevitable Rise in the Price of Gasoline Will Change Our Lives for the Better, as one of the keynote presenters at RM Visions enhanced our desire to participate in RM Visions,” said Glenn Bramer, Director of Product Management and Marketing, Trimble Construction Supply. “We believe that our products will play an ever increasing role in the conservation and control of fuel usage within our industry. We are anxious to hear how the industry intends to deal with increasing fuel costs in the future.”
