

Driving productivity into your ready mix operation with...

Integrity

Systech's reputation in the industry is simple to sum up: We keep our promises.

Superior, reliable customer service is our hallmark. And this legacy of integrity is reflected in the technology solutions we create. Every Integra software module is designed to make someone's job in the ready mix business easier...more accurate, flexible and faster...more productive...and simpler to manage.

Integration

A common database integrates all Integra products – from office modules to dispatch to batching. Contek's Labsys is also integrated, giving Systech users the added efficiency and accuracy that comes with a single data entry point for mix design and quality control.

For ready mix producers, installation is faster. Training is less costly. Data entry is streamlined, and operating costs are reined in.

Intelligence

Systech builds the technology solutions ready mix producers ask for and need. Our deep understanding and knowledge of the business enables us to create solutions that are job-matched. Integra modules are designed to intelligently infuse productivity and efficiency into every task, performed by every employee, wherever possible in your operation.

Systech University is an extension of this philosophy – and another industry first. This comprehensive consulting and training program exposes you and your employees to industry best practices, and explores how to utilize technology to implement those practices within your own plants and operations.

Innovation

The truest measure of how our software and batching systems are revolutionizing the ready mix industry is in the productivity gains.

Our goal is to boost performance – the number of cubic yards per man-hour a ready mix plant is capable of producing and delivering to the job site.

Add together the integrity, integration and intelligence contributed by each and every Integra module to your ready mix operation, and the result is nothing short of a revolution in productivity and profitability.

Integra by Systech is the new choice for driving productivity and profitability into your business with intelligence, integration and integrity.

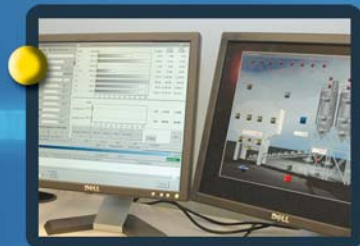

The Integra Series:

- *Batch*
- *Dispatch – Ready Mix*
- *Dispatch – Aggregate*
- *GPS Truck Tracking*
- *Mapping*
- *ERP Integration*
- *Batch Panel Integration*
- *Imaging*
- *Inventory*
- *Quality Control*
- *Executive Information Systems*
- *Office*
 - *Pricing and Invoicing*
 - *Accounts Receivable*
 - *Executive Reporting*
 - *Mix Management*
 - *Sales Analysis*
- *Web*
- *Sales Manager*
- *Sales Letter*
- *Audit*
- *Lien Management*
- *Aggregate*

Leading the Ready Mix Technology Revolution

“Systech innovations boost the productivity of my people, the efficiency of my plants, and the bottom line of my ready mix operations...”

Customer Web Portal

Strengthens customer loyalty, with online views of jobs, accounts

Sales Management

Faster, more accurate and secure, customized quotes with complete integration to billing

Executive Information Systems

Ad-hoc profitability analysis by customer, job, mix, salesmen, etc.

Key Performance Indicators

Customized reporting of key performance measures

Customer Contact Management

Create sales and pricing letters, labels, and communications for email or postal distribution

Dispatching

Boosts truck fleet, drivers, dispatcher productivity, superior fleet management and control

GPS Truck Tracking

Intelligent GPS improves accuracy and productivity

Demand Management

User defined, dynamic, drill-down graphs to optimize production and delivery schedules

Mapping

Turn-by-turn directions, maps and travel times by hour, with real-time integration to Rand McNally

ERP Integration

Real-time integration with SAP, Oracle®, Great Plains, MAS/500, and more

Auditing

Record all changes to master files, tickets and orders without additional effort

Document Imaging

Electronic document management and retrieval optimizes office efficiency and customer service

Back Office

Flexible and powerful pricing, invoicing and sales analysis

Lien Management

Simplifies tracking and management of customer and project lien issues with integration to Office

Batching Accuracy

Faster, more accurate batching: read scales 20X faster, free-falls by bin by material by batch size

Batch Panels

Non-proprietary parts lower maintenance costs and decrease down-time

Materials Inventory

Accurate and real-time inventory control, even when operating manually

Addressable Smart Valves

Eliminate 120V wiring, lower maintenance, 10X longer service life

Wireless Batching

Superior lightning protection, more plant flexibility

Remote Batching

Batch from anywhere on the network, improving staff efficiency and plant profitability

Mix Design & Management

Contek's Labsys integrated with Integra database and batch result analysis

Quality Control

Design, analyze and manage mix designs to maximize quality and profits

Systech's Legacy of Innovation Leadership

1996

Bundled Upgrades
Systech customers always have the latest release of licensed applications

1997

45-minute Response Time, 24/7
Systech introduces guaranteed 45 minute response time 24/7 for support requests

1998

Windows Dispatch
First fully Windows® compliant ready mix dispatch system

2001

Dispatch meets Office
First multi-screen, user designed dispatch system integrated with Microsoft Office®

AGG + RM Dispatch
Dispatch for aggregate and ready mix combined on same screen

2002

EIS Introduced
First ad-hoc Executive Information System

2003

First Intelligent GPS
Provides +0.5 CY/man-hour productivity improvement

2004

Integra Batch Introduced
Sets new benchmarks for batching accuracy, performance with non-proprietary components

2005

Systech University Opens
First industry consulting/training program focused on productivity enhancements

2006

Centralized Batching
Systech pioneers centralized batching with full-featured remote batching capabilities

Smart Valves Arrive
Integra Batch introduces patent-pending smart valve technology to reduce plant maintenance, virtually eliminate 120V wiring

First Wireless Batching
Integra Batch utilizes wireless technology as standard feature for improved lightning protection, system isolation

ERP Integration
Systech introduces Master File Integrator for standardized real-time integration with leading ERP systems

2007

Rand McNally Maps
Systech introduces real-time Rand McNally map integration

Sales Manager Introduced
Industry's first comprehensive, integrated bid and sales process management tool

2008

Integra Web Clicks On
First real-time customer access to order activity, history, accounts receivable activity

Contek Labsys Integrated
Systech integrates Integra with Contek Labsys for single data entry point for mix design and quality control

Shilstone & Systech University
Systech incorporates Jay Shilstone of Contek/Shilstone into Systech University and future Integra product designs
