## **Systech and Trimble to Bring Intelligent GPS to Ready Mix Ops**

For Immediate Release  
John Rabchuk, Systech  
630-515-0200

Woodridge, Illinois -- Systech Inc., an innovative leader in automation technology solutions for the construction materials industry, announced today that it will begin marketing Trimble's line of on-board intelligent GPS status devices with its Integra line of truck dispatching and tracking software.

"The new relationship will help provide ready mix producers with new tools to cut costs and improve productivity," said John Rabchuk, president of Systech. "To stay competitive and thrive in a tough economy, producers must maximize the efficiency of their trucks and plant operations. Systech and Trimble are uniquely equipped with the right tools, expertise and knowledge to make that happen."

The new Systech-Trimble relationship allows for joint marketing and sales efforts for Systech's Integra Dispatch and Integra Track truck tracking software and Trimble's intelligent GPS status devices. The agreement also enables both companies to collaborate more closely in developing and marketing ahead-of-the-curve automation solutions for their customers and to the construction materials industry.

### About Trimble

Trimble applies technology to make field and mobile workers in businesses and government significantly more productive. Solutions are focused on applications requiring position or location—including surveying, construction, agriculture, fleet and asset management, public safety and mapping. In addition to utilizing positioning technologies, such as GPS, lasers and optics, Trimble solutions may include software content specific to the needs of the user. Wireless technologies are utilized to deliver the solution to the user and to ensure a tight coupling of the field and the back office. Founded in 1978, Trimble is headquartered in Sunnyvale, Calif.
